1) Overview of Risk Management

1.1. Introduction & Basis of Preparation

The purpose of the document is to fulfil regulatory disclosure requirements based on the revised Basel banking framework commonly known as "International regulatory framework or Basel III Accord". The "Basel III" framework contains capital requirements for credit risk (including credit risk mitigation techniques), operational risk and market risk.

1.2. Scope of pillar 3 disclosures:

The Basel banking framework contains three main pillars:

- Pillar 1 -Minimum quantitative (capital) requirements
- Pillar 2- Supervisory Review Process.
- Pillar 3-Disclosure requirements in order to reach market discipline by transparency to the public

1.3. Summary of Basel 3 requirements

The Bank complies with the Basel III standards and guidance notes, which have been implemented in the UAE. Basel regulation has evolved to comprise three pillars concerned with minimum capital requirements (Pillar 1), supervisory review (Pillar 2), and market discipline (Pillar 3).

Pillar 1: The first Pillar deals, amongst other things, with the minimum capital requirements. Capital requirements are to be calculated for credit risk, market risk and operational risk. The capital charge for each risk category has to be calculated using an approach that is suitable and sufficient for the individual bank.

Pillar 2: Pillar 2 constitutes risks that are not covered under Pillar 1 assessment. Risk management best practices are at the heart of Pillar 2. Banks must undertake an ICAAP (Internal Capital Adequacy Assessment Process) that looks at all risks to which the bank is exposed. ICAAP allows bank and supervisors to assess on whether the bank is required to hold additional capital to cover the three Pillar 1 risk types or to cover other risks.

Pillar 3: Pillar 3 includes a set of disclosure requirements, which are intended to improve the ability of market participants to assess banks' risk management processes, capital structures & adequacy, and exposures. This transparency is designed to incentivize banks to implement sound and robust risk management frameworks.

1.4. Significant capital adequacy, liquidity and funding related disclosure requirements

Capital adequacy, funding, liquidity and related disclosures in Pillar 3 report has been prepared in accordance with Central Bank of UAE Pillar 3 disclosure requirements as stipulated in Standards, and Guidance re Capital Adequacy in the UAE (Notice CBUAE/BSD/N/2022/5280 dated 30 December 2022) and Explanatory Notes on Pillar 3 Disclosure requirements, the underlying BCBS guidance "Updated Pillar 3 disclosure requirements" issued in May 9 2022.

This report should be read in conjunction with the risk disclosures in audited financial statements.

1.5. Sharjah Islamic Bank (SIB) approach to Pillar 1.

- **Credit risk:** the Bank uses the standardised approach for calculating its capital requirements for credit risk. This approach allows the use of external ratings from designated credit-rating agencies wherever available in determining the appropriate risk weights. The risk weights are determined by the asset class and the external rating of the counterparty. The net exposure incorporates off-balance-sheet exposures after applying the credit conversion (CCF) and credit risk mitigation (CRM) factors.
- **Market risk:** the Bank uses the standardised approach for calculating regulatory market risk capital requirements.
- **Operational risk:** the Bank uses basic Indicator approach (BIA) for computing capital requirements for operational risk. Bank's operational risk is estimated as a percentage (alpha factor 15%) of the gross income (calculated as the average of the previous three financial years).

1.6. Minimum capital requirement

CBUAE Requirement	CBUAE Requirement
CET 1 must be at 7.0% of Risk Weighted Assets (RWA)	7.0%
Tier 1 Capital must be at least 8.5% of RWA	8.5%
Total capital, calculated as the sum of Tier 1 Capital and Tier 2 Capital, must be at least 10.5% of RWA	10.5%
In addition to the minimum CET1 capital of 7.0% of RWA, bank must maintain a Capital Conservative Buffer (CCB) of 2.5% of RWAs in the form of CET1 capital	2.5%
Countercyclical Buffer (CCyB) requirement will vary between 0% to 2.5% of RWA and be communicated by the Central Bank with an adequate notice period.	0 to 2.5%
Minimum Capital Required (Total Capital + Capital Conservative Buffer) = 10.5% + 2.5%	13%

1.7. Basis of Consolidation

The Bank's Pillar 3 disclosures are presented on a consolidated basis incorporating all its subsidiaries excluding commercial entities. In accordance with paragraph 825 of International Convergence of Capital Measurement and Capital Standards issued by the Basel Committee, general disclosures of credit risk provided in this report have a wide range of information about overall credit exposure and may not be necessarily based on information prepared for regulatory purposes.

1.8. Internal Controls and Verification

The key features of internal controls around Pillar 3 reporting are as follows:

- Segregation of duties – maker-checker process is strictly followed in compiling Pillar 3 report;
- Data-sourcing and reconciliation – data is sourced from multiple systems which are reconciled with the general ledger, sub ledgers and audited financial statements;
- Reviews – Pillar 3 report undergoes several rounds of reviews by Finance and Risk functions;
- Internal audit – Internal audit provides independent and objective assurance of disclosures in Pillar 3 report.
- Attestation is obtained from Senior Management that Pillar 3 report has been prepared in accordance with the board-agreed internal control policies and procedures.

1.9. Ownership

Some of the major shareholders above 5% mentioned below

Shareholder	Percentage
Sharjah Asset Management LLC	28.46
Kuwait Finance House	18.18
Sharjah Social Security Fund	9.09

1.10. Board

The Board of Directors ("the Board") is responsible for the overall framework of the risk governance and management. The Board is responsible for determining risk strategy, setting the Group's risk limits and ensuring that risk exposure is monitored, controlled effectively and kept within the set limits. It is also responsible for establishing a clearly defined risk management structure and for approval of the risk policies and procedures, infrastructure and management of all risks related to the Group.

In order to effectively discharge this responsibility, the Board is assisted by Board Committees and Management Committees.

1.11. Executive Committee (EC) of the Board of Directors

The Executive Committee is one of the Board committees that was formed to assist the Board in achieving its strategic and operational objectives. The Committee assists the Board of Directors in fulfilling its responsibilities as follows:

- The Committee has the power to approve credit and investment facilities, within the financing authority delegated to it by the Board.
- To appoint and terminate contracts of independent legal and financial advisors and other advisors as needed.
- To approve the Bank strategy, work plans, objectives, annual budget, capital expenditures and financial facilities, within the limits delegated to it.
- Presenting issues to the Board of Directors based on the recommendations of senior management in addition to submitting relevant proposals to the Board of Directors when necessary to obtain the necessary approvals.

1.12. Group Audit Committee (GAC)

The Board of Directors is responsible for adopting and applying the prudent governance approach of the Bank and its subsidiaries. To achieve these objectives, the board has formed the Group Audit Committee and set the general framework for that committee to enable it to effectively exercise its duties and supervisory role.

This committee reports directly to the Board of Directors and submits the necessary reports to it as a supportive function to the Bank's Board of Directors with regard to its supervisory responsibility towards financial reports, the internal control system, the group's internal audit, external audit, Sharia audit, compliance with laws, legislation, and rules of professional and ethical conduct.

1.13. Group Board Risk Committee (GBRC)

The BRC consists of Board Members and its purpose is to assist the Board in fulfilling its oversight responsibility by:

- Overseeing the risks inherent in the businesses of the Group and the control processes with respect to such risks;
- Reviewing the risk profile of the Group;
- Managing the Risk Management Compliance and control activities of the Group;
- Providing a critical assessment of the organisation's business strategies and plans from an Enterprise risk perspective; and
- Ensuring that appropriate policies and procedures are in place for managing risks to which the Group is exposed.

1.14. Board Nomination & Compensation Committee (BNCC)

The Nominations and Compensation Committee is one of the committees emanating from the Bank's Board of Directors. The following are the main tasks entrusted to the Nominations and Remunerations Committee:

- Oversee the process of appointing qualified individuals to become members of the Board of Directors at the annual general meeting of shareholders and assist the Board of Directors in selecting candidates for senior management positions.

- Assist the Board of Directors in approving remunerations for senior management and oversee the development and operation of the remuneration policies, system and related oversight process.
- Assisting the Board of Directors in the annual self-evaluation of the Board and the independent evaluation by an external party, which includes the performance of the Board of Directors, its members and committees in the Bank and the Bank's remuneration system.

1.15. Management Committee (MANCOM)

The purpose of the Management Committee (**MANCOM**) is to:

- Act as a management tool and decision making executive body of the Bank, involving the requirements and development relating to all areas across the Bank.
- Facilitate in reviewing, formulating, evaluating and providing meaningful decisions on critical issues which are or may impact our organization.
- Monitor timely execution of all such mandated initiatives and problem resolutions so as to periodically measure our collective success.
- Ensuring every member actively participates in cross-functional discussions on issues not directly related to one's own area of operation with a basic purpose of raising and addressing issues which are important from a group wide perspective.

1.16. Investment Committee (IC)

The purpose of the IC is to review the quality of the Group's Investment portfolio on behalf of the Board of Directors, trends affecting the portfolio, the administration of investment related policies, as well as the approval of Investment proposals, including Sukuks and Syndicate Finance within the approval limit set by the BOD.

1.17. IT Steering Committee (ITSC)

The ITSC provides strategic and tactical guidance for managing the Group's overall technology systems in the long and short term, to ensure that Information Technology (IT) initiatives are consistent with the strategic business goals of the Group. The ITSC is charged with assisting the Board in:

- Providing guidance in the prioritization and implementation of technology initiatives and projects (including those related to infrastructure);
- Reviewing IT operations
- Reviewing IT Security plans, policies and reports relating to the effectiveness of information security, their implementation and measures taken to address any residual risks
- Reviewing Business Continuity plans, policies and reports relating to the effectiveness of business continuity, their implementation and measures taken to address any residual risks; and
- Reviewing the Group's IT development, strategic opportunities and plans

1.18. Asset and Liability Committee (ALCO)

The objective of ALCO is to derive the most appropriate strategy for the Group in terms of the mix of assets and liabilities given its expectations of the future and the potential consequences of profit rate movements, liquidity constraints, and foreign exchange exposure and capital adequacy. The ALCO is also responsible to ensure that all strategies conform to the Group's risk appetite and levels of exposure as determined by the Board of Directors.

1.19. Information Security Working Group Committee (ISWGC)

The purpose of the Information Security Working Group Committee (ISWGC) is to ensure that there is clear direction and visible management support for information security initiatives. The committee shall be responsible for the following:

- To provide oversight of information security policies, procedures, plans, and execution intended to provide confidentiality, availability, and integrity of the information.
- To formulate the tasks related to Information Security Management System (ISMS) rollout like Risk Management, Policy and Procedure Deployment, Information Security Awareness, Information Security Incident Monitoring, Measurement of control effectiveness, etc.
- To oversee the effectiveness of the information security controls with respect to its information systems, including network security and data security.
- To monitor the significant development in information security related projects, incidents handling and risk mitigation.
- To review the changes to significant threats and exposures of information assets against cyberattacks, insider activity, error or control failure.

1.20. Credit Committee (CC)

CC manages the credit risk of the Group by continuous review of credit limits, policies and procedures, the approval of specific exposures and work out situation, constant revaluation of the finances portfolio and the sufficiency of provisions thereof.

1.21. Disciplinary Committee (DC)

DC reviews all the cases in the bank and its subsidiaries of alleged misconduct of staff members and to endorse disciplinary action in the event of any violation.

1.22. Group Enterprise Risk Management (GERM)

In order to manage credit, market, operational and IT security risks, GERM is in place. Its role includes the following:

- Develop a strategy, policy framework for risk management such that these are aligned with business requirements;
- Provide support to the Group in implementation of the framework;
- Bring together analysis of risk concentrations and sensitivities across the Group;
- Act as a point of reference for risk and control matters, providing advice to management, sharing best practices and carrying out special reviews as directed by ALCO; and
- Provide independent assessment of, and challenge to the business areas' risk management and profiles to ensure that they are maintained in a robust manner.

Fully Loaded – means banks regulatory capital compared with a situation where the transitional arrangements had not been applied. As per CBUAE circular no. 04/2020 Regulation Regarding Accounting Provisions and Capital Requirements - Transitional Arrangements

As per CBUAE regulation, Prudential filter that permits Banks to add back increase in IFRS 9 provisions (stage 1 and stage 2) to the regulatory capital over a transition period of 5 years, on a proportionate basis. The increase in IFRS 9 provision requirement is determined by calculating difference between IFRS 9 provision as 31 December 2019 and IFRS9 provision as at the reporting date. The proportion of the increase in the IFRS 9 provision that is permitted to be added-back to regulatory capital from 1 January 2020 onwards will be phased out over a 5-year transition period. (100%, 100%, 75%, 50% and 25% from FY 2020 TO 2024)

There is no significant change seen in CET 1 ratio, Total Capital ratio and Leverage ratio. It is marginally changed or remained stable.

3) Overview of Risk Management, Key Prudential Metrics and RWA (OV1)

Minimum capital requirement for total Capital Adequacy Ratio disclosed below includes minimum requirement of 10.5%, which include the capital conservation buffer of 2.5%.

SI.No	30-June-23	a	b	c
		RWA –AED-000		Minimum capital requirements

4) Composition of Capital

The Bank's capital management aims to guarantee solvency and maximise profitability, while complying with regulatory requirements and risk appetite of the bank. It is a key strategic tool for decision making, enabling us to set a common framework of actions, criteria, policies, functions, metrics and processes.

1. Composition of regulatory capital – (CC1)

30 th June 2023		a	b
		Amounts	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation
Common Equity Tier 1 capital: instruments and reserves			
AED 000			
1	Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus	3,235,678	Same as (h) from CC2 template
2	Retained earnings	1,222,301	j
3	Accumulated other comprehensive income (and other reserves)	1,301,643	
4	<i>Directly issued capital subject to phase-out from CET1 (only applicable to non-joint stock companies)</i>	-	
5	Common share capital issued by third parties (amount allowed in group CET1)	-	
6	Common Equity Tier 1 capital before regulatory deductions	5,759,622	
Common Equity Tier 1 capital regulatory adjustments			
7	Prudent valuation adjustments	-	
8	Goodwill (net of related tax liability)	-	CC2 (a) minus (d)
9	Other intangibles including mortgage servicing rights (net of related tax liability)	-	CC2 (b) minus (e)
10	Deferred tax assets that rely on future profitability, excluding those arising from temporary differences (net of related tax liability)	-	
11	Cash flow hedge reserve	-	
12	Securitisation gain on sale	-	
13	Gains and losses due to changes in own credit risk on fair valued liabilities	-	
14	Defined benefit pension fund net assets	-	
15	Investments in own shares (if not already subtracted from paid-in capital on reported balance sheet)	-	
16	Reciprocal cross-holdings in CET1, AT1, Tier 2	-	
17	Investments in the capital of banking, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued share capital (amount above 10% threshold)	-	
18	Significant investments in the common stock of banking, financial and insurance entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	
19	Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability)	-	
20	Amount exceeding 15% threshold	-	
21	Of which: significant investments in the common stock of financials	-	

22	Of which: deferred tax assets arising from temporary differences	-	
23	CBUAE specific regulatory adjustments	-	
24	Total regulatory adjustments to Common Equity Tier 1	-	
25	Common Equity Tier 1 capital (CET1)	5,759,622	
Additional Tier 1 capital: instruments			
26	Directly issued qualifying Additional Tier 1 instruments plus related stock surplus	-	CC2 (i)
27	Of which: classified as equity under applicable accounting standards	-	
28	Of which: classified as liabilities under applicable accounting standards	-	
29	<i>Directly issued capital instruments subject to phase-out from additional Tier 1</i>	-	
30	Additional Tier 1 instruments (and CET1 instruments not included in row 5) issued by subsidiaries and held by third parties (amount allowed in AT1)	-	
31	<i>Of which: instruments issued by subsidiaries subject to phase-out</i>	-	
32	Additional Tier 1 capital before regulatory adjustments	-	
Additional Tier 1 capital: regulatory adjustments			
33	Investments in own additional Tier 1 instruments	-	
34	Investments in capital of banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	
35	Significant investments in the common stock of banking, financial and insurance entities that are outside the scope of regulatory consolidation	-	
36	CBUAE specific regulatory adjustments	-	
37	Total regulatory adjustments to additional Tier 1 capital	-	
38	Additional Tier 1 capital (AT1)	1,836,500	h
39	Tier 1 capital (T1= CET1 + AT1)	7,596,122	
Tier 2 capital: instruments and provisions			
40	Directly issued qualifying Tier 2 instruments plus related stock surplus	-	
41	<i>Directly issued capital instruments subject to phase-out from Tier 2</i>	-	
42	Tier 2 instruments (and CET1 and AT1 instruments not included in rows 5 or 30) issued by subsidiaries and held by third parties (amount allowed in group Tier 2)	-	
43	<i>Of which: instruments issued by subsidiaries subject to phase-out</i>	-	
44	Provisions	-	
45	Tier 2 capital before regulatory adjustments	-	
Tier 2 capital: regulatory adjustments			
46	Investments in own Tier 2 instruments	-	
47	Investments in capital, financial and insurance entities that are outside the scope of regulatory consolidation, where the bank does not own more than 10% of the issued common share capital of the entity (amount above 10% threshold)	-	
48	Significant investments in the capital, financial and insurance entities that are outside the scope of regulatory consolidation (net of eligible short positions)	-	
49	CBUAE specific regulatory adjustments	-	
50	Total regulatory adjustments to Tier 2 capital	-	

51	Tier 2 capital (T2)	487,708	
52	Total regulatory capital (TC = T1 + T2)	8,083,830	
53	Total risk-weighted assets	41,772,380	
Capital ratios and buffers			
54	Common Equity Tier 1 (as a percentage of risk-weighted assets)	13.79%	
55	Tier 1 (as a percentage of risk-weighted assets)	18.18%	
56	Total capital (as a percentage of risk-weighted assets)	19.35%	
57	Institution specific buffer requirement (capital conservation buffer plus countercyclical buffer requirements plus higher loss absorbency requirement, expressed as a percentage of risk-weighted assets)	2.50%	
58	Of which: capital conservation buffer requirement	2.50%	
59	Of which: bank-specific countercyclical buffer requirement	0.00%	
60	Of which: higher loss absorbency requirement (e.g. DSIB)	0.00%	
61	Common Equity Tier 1 (as a percentage of risk-weighted assets) available after meeting the bank's minimum capital requirement.	6.79%	
The CBUAE Minimum Capital Requirement			
62	Common Equity Tier 1 minimum ratio	7.00%	
63	Tier 1 minimum ratio	8.50%	
64	Total capital minimum ratio	10.50%	
Amounts below the thresholds for deduction (before risk weighting)			
65	Non-significant investments in the capital and other TLAC liabilities of other financial entities	-	
66	Significant investments in common stock of financial entities	-	
67	Mortgage servicing rights (net of related tax liability)	-	
68	Deferred tax assets arising from temporary differences (net of related tax liability)	-	
Applicable caps on the inclusion of provisions in Tier 2			
69	Provisions eligible for inclusion in Tier 2 in respect of exposures subject to standardised approach (prior to application of cap)	-	
70	Cap on inclusion of provisions in Tier 2 under standardised approach	-	
71	Provisions eligible for inclusion in Tier 2 in respect of exposures subject to internal ratings-based approach (prior to application of cap)	-	
72	Cap for inclusion of provisions in Tier 2 under internal ratings-based approach	-	
Capital instruments subject to phase-out arrangements (only applicable between 1 Jan 2018 and 1 Jan 2022)			
73	Current cap on CET1 instruments subject to phase-out arrangements	-	
74	Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)	-

Total Liabilities & Shareholders' Equity	61,061,323	61,051,485	

6) Main features of regulatory capital instruments – (CCA)

30 th June 2023	Quantitative / qualitative information
Issuer	SIB Tier 1 Sukuk Company
Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	XS2010323009
Governing law(s) of the instrument	English Law
Regulatory treatment	Tier 1 Capital
Transitional arrangement rules (i.e. grandfathering)	N/A
Post-transitional arrangement rules (i.e. grandfathering)	N/A
Eligible at solo/group/group and solo	At all levels
Instrument type (types to be specified by each jurisdiction)	Perpetual additional Tier 1 sukuk
Amount recognised in regulatory capital (currency in millions, as of most recent reporting date)	AED 1,836 Mio
Nominal amount of instrument	USD 500,000,000
Issue price	USD 100
Redemption price	USD 100
Accounting classification	Tier 1 Equity
Original date of issuance	2nd July, 2019
Perpetual or dated	Perpetual
Original maturity date	Perpetual
Issuer call subject to prior supervisory approval	02/07/2025 (1st Call Date)
Optional call date, contingent call dates and redemption amount	-
Subsequent call dates, if applicable	Every 6th Anniversary after 1st call date
Coupons / dividends	Dividends
Fixed or floating dividend/coupon	fixed
Coupon rate and any related index	5.000 per cent
Existence of a dividend stopper	restrictions on distribution on redemptions, or repurchase of share capital , equity securities and parity securities until the following profit payment has been paid in full (or set aside)
Fully discretionary, partially discretionary or mandatory (in terms of timing)	-
Fully discretionary, partially discretionary or mandatory (in terms of amount)	-
Existence of step-up or other incentive to redeem	-
Non-cumulative or cumulative	Non-Cumulative
Convertible or non-convertible	Non-convertible
Writedown feature	-
If writedown, writedown trigger(s)	Non-Viability Event
If writedown, full or partial	Partial
If writedown, permanent or temporary	Permanent
If temporary write-own, description of writeup mechanism	-
Type of subordination	-
Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument in the insolvency creditor hierarchy of the legal entity concerned).	Subordinated in right of payment to Senior Obligations, pari passu with all Pari Passu Obligations and subject to the Solvency Conditions and no bankruptcy order, in priority to Junior Obligations. To the extent the Solvency Conditions are not satisfied or if a bankruptcy order in respect of SIB has been issued by a court in the UAE, claims shall be extinguished
Non-compliant transitioned features	-
If yes, specify non-compliant features	-

7) Leverage Ratio

Basel III introduced a 3% minimum leverage ratio which is calculated on quarterly basis. The bank does not see any material changes for this reporting period which remained stable and above the CBUAE minimum requirement.

1. Summary comparison of accounting assets vs leverage ratio exposure LR1

	30-June-23	AED 000
		a
1	Total consolidated assets as per published financial statements	61,061,323
2	Adjustments for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	(9,838)
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-
4	Adjustments for temporary exemption of central bank reserves (if applicable)	-
5	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
6	Adjustments for regular-way purchases and sales of financial assets subject to trade date accounting	-
7	Adjustments for eligible cash pooling transactions	-
8	Adjustments for derivative financial instruments	-
9	Adjustment for securities financing transactions (ie repos and similar secured lending)	-
10	Adjustments for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)	1,916,749
11	Adjustments for prudent valuation adjustments and specific and general provisions which have reduced Tier 1 capital	-
12	Other adjustments	1,995,944
13	Leverage ratio exposure measure	64,964,178

2. Leverage ratio common disclosure template – (LR2)

26	CBUAE minimum leverage ratio requirement	3.00%	3.00%
27	Applicable leverage buffers	-	-

8) Liquidity

Liquidity risk is the risk that the Group will encounter difficulty in meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets. It includes the risk of the inability to fund assets at appropriate maturities and rates and the inability to liquidate assets at reasonable prices and in an appropriate timeframe and inability to meet obligations as they become due. Liquidity risk can be caused by market disruptions or credit downgrades which may cause certain sources of funding to diminish.

The Group's approach for managing liquidity risk is to ensure that, management has diversified funding sources and closely monitors liquidity to ensure adequate funding.

The Group's board of directors set the Group's strategy for managing liquidity risk and delegates responsibility for oversight of the implementation of this policy to ALCO. ALCO approves the Group's liquidity policies and procedures. Treasury department manages the Group's liquidity position on a day-to-day basis and reviews daily reports covering the liquidity position of both the Group and operating subsidiaries. All liquidity policies and procedures are subject to review and approval by ALCO.

1. Governance of liquidity risk management: ALCO is the primary committee responsible for liquidity and funding risk management based on guidelines approved by the Board Risk Committee (BRC). Liquidity policies and framework are reviewed by the ALCO and approved by the BRC prior to implementation.
2. Funding strategy: The Bank's liquidity and funding positions are supported by the Bank's significant government and retail deposit base, accompanied by funding from wholesale markets. The Bank's retail deposit base comprises current and savings deposits which, although payable on demand, have traditionally in aggregate provided stable sources of funding. The Bank's reputation, earnings generation capacity, strong credit rating, financial and capital strength including offering of competitive deposit rates are core attributes to preserve depositors' confidence and ensure liquidity. The Bank accesses the wholesale markets through the issuance of debt instruments, time deposits to meet short-term obligations.
3. An explanation of how stress testing is used. A liquidity stress test program is in place to ensure liquidity stress tests are systematically performed to determine the impact on the counterbalancing capacity under the "bank-specific" and "market wide" scenarios and the possible sources of funding to meet the shortfalls during a liquidity crisis.
4. An outline of the bank's contingency funding plans. Contingency funding plan is in place to identify early warning signals of a liquidity problem. The contingency funding plan also sets out the crisis escalation process as well as the various strategies to be employed to preserve liquidity including an orderly communication channel during a liquidity problem.
5. Customised measurement tools or metrics that assess the structure of the bank's balance sheet or that project cash flows and future liquidity positions, taking into account off-balance sheet risks which are specific to the bank. The primary tools for monitoring liquidity and funding positions are the maturity mismatch analysis, assessment on the concentration of funding, the availability of unencumbered assets and the use of market-wide information to identify possible liquidity problems. Liquidity and funding positions are reported to the ALCO on a monthly basis and to BRC on a quarterly basis.

1. Eligible Liquid Assets Ratio (ELAR)

1	30-June-23	High Quality Liquid Assets	Nominal amount – AED 000	Eligible Liquid Asset –AED 000
1.1	Physical cash in hand at the bank + balances with the CBUAE		8,913,141

2.4	Total Stable Resources (2.2 +2.3.7)		42,871,130
3	Advances TO STABLE RESOURCES RATIO		78.42%

9) Credit Risk

Credit risk is the risk that a customer or counterparty to a financial asset fails to meet its contractual obligations and cause the Group to incur a financial loss. It arises principally from the Group's investment in Islamic financing receivables, murabaha and wakala with financial institutions, international murabaha and wakala with financial institutions, other assets (except prepayments and assets available for sale) and investments in sukuk. For risk management reporting purposes, the Group considers and consolidates all elements of credit risk exposures into different sectors.

The Group manages its credit risk exposure through diversification of its financing activities and investments to avoid concentration of risk with individuals or group of customers in specific location or business.

In addition, the Group manages the credit exposure by obtaining security where appropriate and limiting the duration of exposure. In certain cases, the Group may also close out transactions or assign them to other counterparties to mitigate credit risk.

Regular audits of business units and Group credit processes are undertaken by the internal audit division.

The Governance Structure at SIB, comprise of five levels with the Board and Board Committees at Level 1 and 2 respectively, followed by the three Lines of Defence.

1. 1st Line of Defence - The business line is the first line of defence and has 'ownership' of risk that it incurs in conducting its activities
2. 2nd Line of Defence - The compliance and risk management functions are deemed part of the second line of defence and are in charge of overseeing the risk exposure of the bank along with various Support Divisions
3. 3rd Line of Defence - The internal audit along with Shari'ah Audit provides independent assurance to the board that the overall governance framework is effective and that policies and processes are in place and consistently applied.

Regular reporting to the Senior Management and the Board Risk Committee is done by the CRO including credit risk top exposures, NPL, breaches (if any), etc.

1.The Group considers a financial asset to be in default when:

1. The customer is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising collateral (if any is held);
2. It is becoming probable that the customer will restructure the asset as a result of bankruptcy due to the customer's inability to pay its credit obligations.

2.In assessing whether a customer is in default, the Group considers indicators that are:

1. Qualitative: e.g. breaches of covenant;

2. Quantitative: e.g. overdue status and non-payment on another obligation of the same issuer to the Group; and
3. Based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances. The definition of default largely aligns with that applied by the Group for regulatory capital purposes.

3. The key inputs into the measurement of ECL are the term structure of the following variables:

- a) Probability of Default (PD);
- b) Loss Given Default (LGD); and
- c) Exposure at Default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For financings secured by retail and commercial property, CBUAE haircuts are a key parameter in determining LGD. LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective price rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For financing commitments, the EADs are potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the amount of the guaranteed exposure when the financial guarantee becomes payable. For some financial assets, EAD is determined by computing credit conversion factors through modelling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Group measures ECL considering the risk of default over the maximum contractual period (including any customer 's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Group considers a longer period. The maximum contractual period extends to the date at which the Group has the right to require repayment of a finance or terminate a finance commitment or guarantee.

However, for retail and credit card facilities that include both a financing and an undrawn commitment component, the Group measures ECL over a period longer than the maximum contractual period if the Group's contractual ability to demand repayment and cancel the undrawn commitment does not limit the Group ' s exposure to credit losses to the contractual notice period. These facilities do not have a fixed term or repayment structure and are managed on a collective basis. The Group can cancel them with immediate effect but this contractual right is not enforced in the normal day-to-

day management, but only when the Group becomes aware of an increase in credit risk at the facility level. This longer period is estimated taking into account the credit risk management actions that the Group expects to take, and that serve to mitigate ECL.

Where modelling of a parameter is carried out on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics that include:

- Instrument type;
- Credit risk grading;
- Date of initial recognition;
- Remaining term to maturity;
- Industry; and Geographic location of the customer.

4. Financial assets with renegotiated terms

For the purposes of disclosures in these consolidated financial statements, 'Investment in Islamic financing with renegotiated terms' are defined as investment in Islamic financing that have been restructured due to a deterioration in the customer's financial position, for which the Group has made concessions by agreeing to terms and conditions that are more favorable for the customer than the Group had provided initially and that it would not otherwise consider.

The Group renegotiates investment in Islamic financing to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Group's forbearance policy, forbearance is granted on a selective basis if the customer is currently in default on its liability or if there is a high risk of default, there is evidence that the customer made all reasonable efforts to pay under the original contractual terms and the customer is expected to be able to meet the revised terms.

1. Credit quality of assets – (CR1)

30-June - 2023	Gross carrying values of		Allowances/ Impairment s	Of which ECL accounting provisions for credit losses on SA exposures		Net values AED - 000
